Steritech Requirements

Pallet Dimensions and Weight The maximum allowable dimensions of a pallet are 220cm x 120cm x 120cm (Height x Width x Length). The maximum allowable weight of a pallet is 1050kg. Please contact Steritech if you have unusual or large sized items.

Product Identification Pallets must be clearly marked with identification that can connect them to the customer name listed on this form and at least one unique identifier such as, but not limited to; user purchase order reference, user batch/lot reference.

Pallet Security Products that contain any liquid, need to be completely sealed to prevent leakage.

Transport Please inform all transport/courier drivers that goods will only be released if a valid Steritech lot number or invoice number can be provided on pickup.

Additional Charges Additional charges may apply if any breaches/discrepancies to the above are identified.

Authorisation

I authorise this consignment to be irradiated and confirm the details are correct and true.
